

CREATING AN OVAL CROP ON A PHOTO

In Corel Draw import your photo that you want to engrave.

Using the rectangle tool draw a rectangle around the entire photograph.

Using the Ellipse Tool, draw an ellipse around the area of the photo that you want to engrave.

Select your Pick Tool (the arrow), you should already have the ellipse selected so that it has nodes around it. Hold the shift key down and click on the rectangle. Now, both the rectangle and the ellipse are selected. Click on the ARRANGE menu and click on Combine.

Using your left mouse button click on the color white on the color palette. Then use your right mouse button and click on the No Fill box on the color palette (white box with black X through it.)

In order to move the photo around on the screen you will need to group everything. Using your Pick Tool draw a net around the whole thing (rectangle, ellipse and photo.) Click on ARRANGE menu and click on Group.
